12d Fred and Theresa Holtzclaw Chapter 53: Population Ecology 1. What two pieces of data are needed to mathematically determine density?  $D = M/V$  2. What is the difference between density and dispersion? The density of a population is the number of individuals per unit area or volume. ...

## **Chapter 53: Population Ecology - Biology E-Portfolio**

You may recall from Chapter 54 that biomass is the total mass of all individuals in a trophic level. Another way of defining net primary production is as the amount of new biomass added in a given period of time. Why is net primary production, or the amount of new biomass/unit of time, the key measurement to ecologists?
