Aratus was a Greek didactic poet. His major extant work is his hexameter poem Phenomena, the first half of which is a verse setting of a lost work of the same name by Eudoxus of Cnidus. It describes the constellations and other celestial phenomena. The second half is called the Diosemeia, and is chiefly about weather lore. Although Aratus was somewhat ignorant of Greek astronomy, his poem was very popular in the Greek and Roman world, as is proved by the large number of commentaries and Latin tr

This chapter considers the importance of Cicero's Aratea, a translation of Aratus' Phaenomena, to his classical ambitions. It argues that while Cicero likely translated the poem as part of his training as an orator, his creative incorporation within the translation of Aratus' Hellenistic reception is a sign that he also had lofty plans for it. The Phaenomena was an instant classic in the ...
