Amazon.com: celestron autoguider

Celestron Autoguider - posted in Celestron Computerized Telescopes: Hi! Im buying my new scope, a CPC800 + wedge this week. I was wondering if it would be a good idea to also buy the Celestron Nexguide Autoguider, to attach to the telescope. Any of you uses it? Is it a good idea? If I buy it, do I need to buy anything else, lika a bigger finderscope to allow the tracking, or do you think it ...

Celestron Autoguider - Celestron Computerized Telescopes ...

A Celestron (any SCT) is best guided with an OAG. An OAG does best with a camera such as the ASI290MM-mini. The ASI120MM-mini will work most of the time, but there are situations where it will not be able to find stars.

Older Celestron C8-SGT and compatible autoguider ...

Celestron's Off-Axis Guider addresses these challenges by: Providing a large 12.5 mm prism that can be adjusted to move closer to the center of the telescope's focal plane, depending on the size of the imaging camera. This results in brighter guide stars, with the help of the large prism to fully illuminate the autoguider sensor.

Off-Axis Guider | Celestron - Telescopes, Telescope ...

Now you can get a complete guidescope package from Celestron which includes both 80mm refractor and 125mm rings. No need to fumble in the dark with an uncomfortable diagonal, because the included extension tube helps you to easily reach focus.

80mm Guidescope Package | Celestron - Telescopes ...

Autoguider port - posted in Celestron Computerized Telescopes: Hi all! know everyone has kind of shot down any notion of taking long exposures with the nexstar mount so why is there an autoguider port? Does it work? will it only work in EQ mode? Im just curious since I just purchased a Canon T2i for family fotos . What is the longest exposure someone has taken with their nexstar?

How do you use StarSense and autoguider together? - posted in Beginning and Intermediate Imaging: My scope is a Celestron AVX 9.25 and I just ordered Star Sense (yeah, I could do the alignment manually but it took me 10-20 minutes and if StarSense does it in three minutes its worth it not just for the time but just for the lack of stress). Im wondering in the future how I can use it with ...

How do you use StarSense and autoguider together ...

Enables automatic alignment of your Celestron computerized telescope. See a full list of compatible telescopes in the technology tab. No need to identify or locate any star in the sky-StarSense automatically aligns your telescope, so you can begin observing in minutes

StarSense AutoAlign | Celestron - Telescopes, Telescope ...

This NexGuide Autoguider from Celestron is a stand-alone autoguider. Using this autoguider eliminates the need for a computer to control the mount. Users with DSLR cameras can use this to enhance their imaging sessions by pointing to the wanted celestial object, and keeping the object centered!

Celestron NexGuide Autoguider - 93713 - High Point Scientific

Autoguiding is accomplished by sending small corrections to your telescope mount via an ST-4 cable communicating from your guide camera to the mount. You can also autoguide using the pulse-guiding method that utilizes a direct connection from your PC to the telescope mount.

Autoguiding a Telescope for Deep Sky Astrophotography ...

These ASCOM drivers are for your Celestron mount, not the Skyris camera. Skyris will work in other programs as outlined in step 2. Download and install a popular autoguiding program of your choice, such as PHD Guiding. The camera works with a number of other programs such as MaxIm DL, Guidemaster, MetaGuide, and more.

Compact, all-in-one autoguiding solution with everything you need to optimize astrophotography accuracy. Includes Mini 50mm guide scope, StarShoot AutoGuider, adjustable bracket, and more. Works with photographic telescopes up to 1500mm focal length.

How To Use an Autoguider | Orion Telescopes: Videos

Autoguiding has revolutionized the capture of deep-sky astro-images by mechanizing the tedious and tiring method of "manually" guiding an astrophotography exposure, which involved staring endlessly into an illuminated reticle telescope eyepiece while vigilantly tweaking your mount's electronic drive controls by hand to keep the stars pinpoint sharp.
