The following is a defined list of terms which are used to describe leaf morphology in the description and taxonomy of plants. Leaves may be simple (a single leaf blade or lamina) or compound (with several leaflets). The edge of the leaf may be regular or irregular, may be smooth or bearing hair, bristles or spines.

Glossary of leaf morphology - Wikipedia

A Complete Overview Of Circular Linked List. A circular linked list is a variation of the linked list. It is a linked list whose nodes are connected in such a way that it forms a circle. In the circular linked list, the next pointer of the last node is not set to null but it contains the address of the first node thus forming a circle.

Circular economy is a manifestation of economic models that highlight business opportunities where cycles rather than linear processes, dominate. It is restorative and regenerative by design and aims to keep products, components, and materials at their highest utility and value at all times. In today's established economic systems, goods are produced, used and discarded, aContinue Reading
