For paperboard folding boxes. Or made of corrugated board. Made of plastic. And much more. The best performance. In every price range. With tools from ...

Cutting dies and thermoforming tools | Marbach portfolio

Many die cutting machines incorporate multiple stations into the production process. The dies used for rotary die cutting include adjustable dies, engraved dies, and magnetic plate tooling. Engraved dies benefit applications that require high tolerances, and adjustable dies help for processes working with removable and replaceable blades.

Die Cutting & Converting Services - NADCO® Tapes & Labels, Inc

Die cutting is a fabrication process which employs specialized machines and machine tools to convert stock material by cutting, forming, and shearing it into custom shapes and designs. Both versatile and customizable, the die cutting process is suitable for a wide range of materials, including metal, plastic, wood, and composites.
