Probability and Dependent Events Worksheet About This Worksheet: In this one your first choice will affect the outcome of every other choice you make. See if you can keep up with the math behind it. How Long?: 8 - 10 minutes Standards Met: Calculating Probability of Dependent Events.

Probability and Dependent Events Worksheet

Worksheet by Kuta Software LLC Kuta Software - Infinite Algebra 2 Independent and Dependent Events Name____ Date____ Period____ Determine whether the scenario involves independent or dependent events. 1) You flip a coin and then roll a fair six-sided die. The coin lands heads-up and the die shows a one.

Independent and Dependent Events - Kuta

Independent 3) You flip a coin twice. The first flip lands heads-up and the second flip lands tails-up. Independent 4) You roll a fair six-sided die three times. The die shows an even number every time. Independent Find the probability. 5) A bag contains three red marbles and three blue marbles. You randomly pick a marble

Independent and Dependent Events - Kuta

Two events are said to be independent if the result of the second event is not affected by the result of the first event. The probability of one event does not change the probability of the other event. If A and B are independent events, the probability of both events occurring is the product of the probabilities of the individual events.

Download Ebook Independent And Dependent Probability Worksheet With Answer Key

Objective: I know how to find the probability events that are dependent. What are dependent events? Events are dependent if the outcome of one event affects the outcome of another. For example, if you draw two colored balls from a bag and the first ball is not replaced before you draw the second ball then the outcome of the second draw will be affected by the outcome of the first draw.

Dependent Events Probability Worksheets (Solutions)

Take this quiz to determine if the example is an independent or dependent event. Dependent events are linked to another event, while independent events are single events and do not affect the probability of the other.

Probability : Independent or Dependent Events Quiz

Practice: Dependent and independent events This is the currently selected item. Math · Statistics and probability · Probability · Conditional probability and independence

Dependent and independent events (practice) | Khan Academy

This activity sheet allows students to calculate both independent and dependent probability, classify each, and then convert them to a percent. I used this in my journal in conjunction with the smartboard presentation. This works well in conjunction with Poppin Popcorn Smartboard Activity.
