the traditional hard-coded approach, we program a computer to perform a certain task. We tell it exactly what to do when it receives a certain input. In mathematical terms, this is like saying that we write the $f(x)$ such that when users feed the input x into $f(x)$, it gives the correct output y .

programmed to do so.

Machine learning - Wikipedia

Fantastic introduction to machine learning in Python. The examples are well written, and do a very nice job of introducing both the implementation and the concept for each model. I'm halfway thru the book, and am really enjoying it.
