**Jollys Diseases Of
Childrenhow Not**

"Diseases of Children"
is a text which aims to
show the reader how to
combine caring for the
child with curing the
disorder. In the fifth
edition Malcolm Levene
added skills in
neonatology, and his
assumption of overall
responsibility for Jolly's
Diseases of Children is
reflected in further
change.

as it leads to a red rash on the face that seems to be a slap mark.

Indeed, a lacy red rash may take place on the child's chest and limbs.

The fifth disease does not constantly make a child feel unwell, yet it can seem like a cold near the beginning, prior to the rash appears.

This is a picture of a red blood cell with a Howell-Jolly body (red arrows). They are left over nuclear remnants that are usually

removed when blood cells are in the spleen.

Howell-Jolly bodies occur where there is no spleen or an non-functioning spleen, referred to as asplenia.

They are usually one of these at most in a red

Fifth disease is a viral illness that causes a rash (exanthem). Fifth disease is also called erythema infectiosum.

And it's known as "slapped cheek" disease. This is

because the rash can cause a child's cheeks to become very red.

Fifth disease is spread from one child to another through direct contact with fluid from the nose and throat.
