I learnt first order logic a few months ago as well as fitch-style natural deduction as a proof system. It's been incredibly helpful in terms of working through exercises in math books. It very much reminds me of algebra classes in high school where you could translate a problem into symbols and manipulate the symbols to get the answer you want.

Help with an LPL exercise - 6.12 : logic

Exercise 2.14. Angelo, Bruno and Carlo are three students that took the Logic exam. Let's consider a propositional language where A="Aldo passed the exam", B="Bruno passed the exam", C="Carlo passed the exam". Formalize the following sentences: 12
