Pre-wait is the amount of time that QLab waits between receiving a trigger for a cue and starting the action of that cue. For example, an Audio cue with a pre-wait of 3 would start playing sound three seconds after being triggered. The pre-wait of a cue can be edited by double clicking and typing in the pre-wait column, or by using the

Used from Broadway to Britain's West End, QLab software is the tool of choice for many of the world's most prominent sound, projection, and integrated media designers. QLab 3 Show Control: Projects for Live Performances & Installations is a project-based book on QLab software covering sound, video, and show control.

Qlab 3 Show Control: Projects for Live Performances ...

BTW, in Qlab 3 the Active Cue list has an "x" to kill the cue with a 1 sec fade, it does not stop it abruptly. We just did 3 Musketeers and had fight music running during the fight scenes, and the Sound OP just used the Device and Levels Master slider to fade up and down the music when the actors would speak. A tad clunky but it worked fine.

Does QLab3 support manual fade-out-and-stop? | ControlBooth

QLab 3 has support for the open-source framework Syphon. This enables QLab to ingest and deliver full-frame video to/from other syphon-enabled applications. Available Syphon inputs will automatically appear as camera cues and Syphon Outputs can be created when setting up a video surface.
